

Which colour is what?

Display the six colour splodge labels and the labelled pots containing;

Mustard
Chocolate spread
Milk
Black treacle
Tomato ketchup
Ice cream
(needs to be blue ice cream; perhaps you could use food colouring!)

Dip a finger in one of the pots (for example, tomato ketchup). Move your finger across the six colour splodge labels as if seeking a 'match'.

Find the red splode and announce, "Sos rudh yw rudh! Tomato ketchup is red! Sos rudh yw rudh!" Ask the whole class to copy your sentence.

Repeat with, "Dehen rew yw glas! Ice cream is blue! Dehen rew yw glas!"

"Kedhow yw melyn! Mustard is yellow! Kedhow yw melyn!"

"Molas du yw du! Black Treacle is black! Molas du yw du!"

"Leth yw gwynn! Milk is white! Leth yw gwynn!"

"Kyfeyth Choclet yw gell!
Chocolate spread is brown!
Kyfyeth Choclet yw gell!"

Now conceal your colour splodge labels and give each group a set of colour word labels.

Challenge them to place the correct label with the correctly coloured pot.
