

Numbers

Make a Number Line by printing out the numbers and pegging them along a washing line

Spend some time with the class simply chanting through the numbers 1-10 until they are learned parrot fashion.

Challenge pupils to work out and learn by heart their own telephone number.
eg (01208) 873624 would be **mann, onen, dew, mann, eth; eth, seyth, tri, hwegh, dew, peswar**

Challenge pairs of pupils to make their own dice labelled with the words for numbers in Cornish. Remember; opposite sides add up to seven;
eg **Tri ha peswar yw seyth**

Use these dice for allsorts of classroom games.

For all class activities ask pupils to give items a rating out of ten (in Cornish of course...)
